Linear Forms

11^{th} Maths - Chapter 10

The following problem is question 15 from exercise 10.3:

1. The perpendicular from the origin to the line $y = mx + c$ meets it at the point $(-1, 2)$. Find the values of m and c.

Solution:
Given ,

$$\mathbf{P} = \begin{pmatrix} -1 \\ \\ 2 \end{pmatrix} \tag{1}$$

$$\mathbf{O} = \begin{pmatrix} 0 \\ \\ 0 \end{pmatrix} \tag{2}$$

Direction Vector from $\mathbf{O}$ to point $\mathbf{P}$ is given by

$$\mathbf{O} - \mathbf{P} = \begin{pmatrix} 1 \\ \\ -2 \end{pmatrix} \tag{3}$$

If the lines are perpendicular then,

$$(\mathbf{O} - \mathbf{P})^{\top}\mathbf{m} = 0 \tag{4}$$

$$\begin{pmatrix} 1 & -2 \end{pmatrix} \begin{pmatrix} 1 \\ \\ m \end{pmatrix} = 0 \tag{5}$$

$$1 - 2m = 0 \tag{6}$$

$$m = \frac{1}{2} \tag{7}$$

By substituting the m value in line equation, we get

$$2 = \frac{1}{2}(-1) + c \tag{8}$$

$$c = \frac{5}{2} \tag{9}$$

therefore, Values of m and c are $\frac{1}{2}$ and $\frac{5}{2}$
